SUMMARY

IT Service Desk Analyst with 3+ years of experience supporting Microsoft 365, Active Directory, and enterprise networks in Windows and macOS environments. CompTIA Security+ certified with hands-on SOC and incident response experience using Sentinel, Rapid7, and Trellix. Pursuing CySA+ and SC-900 to transition into a Security Operations Center (SOC) Analyst or Junior Cyber Analyst role.

CERTIFICATIONS

- CompTIA Security+
- CompTIA CySA+ (Expected 10/2026)
- Microsoft SC-900: Security, Compliance, and Identity Fundamentals (Expected 08/2026)

EDUCATION

Computer Systems Technician – Networking, Centennial College 2022

EXPERIENCE

Corus Entertainment

10/2024 – Present

Service Desk Analyst I

- Delivers first-level technical support for hardware, software, and network issues across the organization, resolving incidents within KPI targets.
- Utilizes Microsoft SCCM for operating system deployments, remote access, hardware inventory, and software packaging to prepare end-user devices.
- Monitors and manages IT support tickets in SolarWinds Web Help Desk, ensuring timely resolution of incidents and service requests while maintaining accurate documentation.
- Collaborates with cybersecurity, infrastructure, and networking teams to escalate and resolve technical incidents.
- Supports a large-scale domain migration project by provisioning endpoint hardware and software, and guiding users through VDI setup to access legacy domain resources.
- Monitors security alerts in Rapid7 SIEM and uses Trellix to investigate potential threats, review endpoint activity, and assist with incident response.

The Wynford Group

09/2022 – 05/2024

Technical Support Specialist

- Administered Active Directory user accounts, including creation, modification, and deletion of profiles, permissions, password resets, and Group Policy management to maintain secure network access.
- Supported both Office 365 and Google Workspace environments, managing user accounts, configuring settings, and troubleshooting issues to ensure seamless email, collaboration, and productivity tool functionality.
- Managed hardware and software asset inventory, including procurement, disposal, and maintaining accurate, up-to-date inventory records to support efficient IT operations.

PROJECTS

Azure Cloud Security Monitoring Lab (Microsoft Sentinel SOC Project)

Deployed Azure Virtual Machines and configured Microsoft Sentinel (SIEM) with Log Analytics to simulate, detect, and investigate security incidents in a cloud honeynet environment.
